☒ Responsive to communication(s) filed on Mar 2, 2000

☒ This action is **FINAL**.

☐ Since this application is in condition for allowance except for formal matters, **prosecution as to the merits is closed** in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claim

☒ Claim(s) 1-14 is/are pending in the application

Of the above, claim(s) _____ is/are withdrawn from consideration

☐ Claim(s) _____ is/are allowed.

☒ Claim(s) 1-14 is/are rejected.

☐ Claim(s) _____ is/are objected to.

☐ Claims _____ are subject to restriction or election requirement.

Application Papers

☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

☐ The drawing(s) filed on _____ is/are objected to by the Examiner.

☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.

☐ The specification is objected to by the Examiner.

☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

☐ All ☐ Some* ☒ None of the CERTIFIED copies of the priority documents have been
☐ received.

☐ received in Application No. (Series Code/Serial Number) _____

☐ received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

*Certified copies not received: _____

☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

☒ Notice of References Cited, PTO-892

☒ Information Disclosure Statement(s), PTO-1449, Paper No(s). 9

☐ Interview Summary, PTO-413

☐ Notice of Draftsperson's Patent Drawing Review, PTO-948

☐ Notice of Informal Patent Application, PTO-152

Art Unit: 2751

DETAILED ACTION

Response to Amendment

This final Office action is in response to amendment A, paper #10, filed 3/2/00 (never received) and refiled 4/24/00 by fax. Claims 1-14 were amended. Claims 1-14 are pending. All rejections and objections not repeated below are withdrawn. Applicant's arguments have been considered but are moot in view of the new grounds of rejection.

Filing Receipt with Incorrect Serial Number

Applicant's letter regarding the filing receipt with an incorrect serial number has been received. The Examiner has determined that the mailed copy of the amendment (filed 3/2/00) was erroneously treated as a new application by OIPE and given the serial number 09/517610. Therefore the amendment never made it to the 09/023172 case. The copy of the amendment refiled by fax is sufficient and has been entered in 09/023172. The original amendment will be retrieved from 09/517610 and placed in 09/023172, and 09/517610 will be ordered destroyed. Any subsequent mailings Applicant may receive on 09/517610 may be ignored.

Art Unit: 2751

Specification

1. The abstract of the disclosure is objected to because it is not clear to the Examiner what is meant by the phrase "system memory module" in line 3. Perhaps Applicant intended --system memory controller--. Appropriate correction or clarification is required. Applicant's remarks indicated a substitute abstract was present, however none was received with the (fax) amendment. If a new abstract was present in the mailed amendment, it will be retrieved and entered in the case, overcoming this objection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, and 6-14 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,045,781 to Levy et al., hereinafter simply Levy.

Art Unit: 2751

Regarding claims 1, 12, and 13, Levy shows a memory module 30 which includes a memory module controller and a plurality of memory devices (low stack 0-3 and high stack 0-3) in Fig. 1.

Levy shows the claimed memory module controller as memory transceiver 41 and memory control and timing unit 42 and their input and output lines. Levy shows the claimed first interface circuitry (input lines into memory transceiver 41 and memory control and timing unit 42) which receives a first memory transaction from a system memory controller (memory management unit 22) in a first format as claimed.

Levy further shows the claimed control logic (memory transceiver 41 and memory control and timing unit 42) which is coupled to the first interface circuitry and converts the first memory transaction into a second memory transaction in a second format for the plurality of memory devices as claimed. The second memory transaction format is clearly different from the first memory transaction format since the outputs of memory transceiver 41 and memory control and timing unit 42 are clearly different from their inputs. This is indicated by the differing nature of the signal lines shown in Fig. 1 and by the other figures and disclosure.

Art Unit: 2751

Regarding claims 2 and 14, Levy shows the claimed second interface circuitry as the output lines from memory transceiver 41 and memory and control unit 42.

Regarding claim 6, Levy does not explicitly mention the claimed handshaking logic and handshake signal, however they are inherent in his device since his memory controller necessarily communicates data to the system memory controller. It is clear that the memory module controller communicates address, data, and control signals to the system memory controller since the address (A), data (D), and control (C) lines of memory bus 40 are bidirectional.

Regarding claims 7-11, the claimed elements are inherent parts of Levy's memory transceiver 41 and memory control and timing unit 42.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior

Art Unit: 2751

art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 4, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 4,045,781 to Levy et al., hereinafter simply Levy.

Levy shows separate address, data, and command lines for between the system memory controller and the plurality of memory devices on the memory module. He does not teach that his transactions include time-multiplexed address, data, and command information as claimed, however it would have been obvious to one skilled in the art to time-multiplex the information to save signal lines and their associated cost and space. Additionally, once the skilled artisan multiplexed information, he would have to provide the claimed request handling logic to demultiplex it to the control logic.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 2751

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-14 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 09/023170 and claims 1-17 of copending Application No. 09/023234. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

Claims 1-20 of 09/023170 are directed to a memory module having memory devices and a memory module controller. A system memory controller is connected to the memory module controller with a memory bus.

Claims 1-14 of 09/023172 are directed to a memory module having memory devices and a memory module controller. A system memory controller (or a system memory module) is connected to the memory module controller with a memory bus. The memory module

Art Unit: 2751

controller comprises interface circuitry to receive transactions from the memory bus and further comprises control logic to generate other transactions for the memory devices.

The memory module controller of 09/023170 necessarily includes interface circuitry to receive transactions from the memory bus and further necessarily includes control logic to generate other transactions for the memory devices, therefore 09/023170 is not patentably distinct from 09/023172.

Claims 1-17 of 09/023234 are directed to a memory module having memory devices and a memory module controller.

The memory module of 09/023234 is necessarily connected to a system memory controller of some sort (a special chip or the CPU) with a memory bus and the memory module controller necessarily includes interface circuitry to receive transactions from the memory bus and further necessarily includes control logic to generate other transactions for the memory devices, therefore 09/023172 is not patentably distinct from 09/023234.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 2751

Conclusion

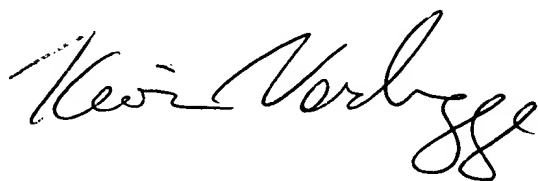

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this or an earlier communication from the Examiner should be directed to Kevin Verbrugge by phone at (703) 308-6663.

Art Unit: 2751

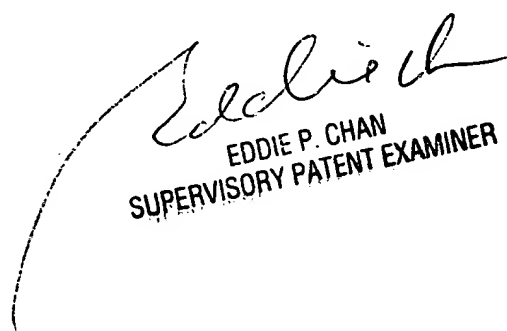

Any response to this action should be mailed to Box AF, Commissioner of Patents and Trademarks, Washington, D.C. 20231 or faxed to (703) 308-9051 or -9052 and labeled "OFFICIAL" or "UNOFFICIAL" as appropriate. Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).
